AcadMate — AI-Powered Personalized Academic Advisement System

Team Members, Roles & Contact

Team Member	Role	Email Address
Tafadzwa Nhesvure	Product Owner / AI-ML Developer	tn26904n@pace.edu
Pranali Dukhande	Scrum Master / Backend Developer	Pd18189n@pace.edu
Datta Vardhan Reddy Kontham	Database Manager / Backend Developer	dk46732n@pace.edu
Pragnan Chintu Gulivindala	Tester	pg79476n@pace.edu
Liangxian Li	Backend Developer	ll64396n@pace.edu
Lyno Chihwehwete	Frontend Developer / LLM Developer	tc92576n@pace.edu
Saisai Hu	Developer	sh50061n@pace.edu

1. Communication & Collaboration

- **Communication Channels:** Use Zoom for meetings and technical discussions, WhatsApp for quick updates, GitHub for code, and GitHub Wiki for documentation.
- **Respect**: Respect everyone's opinions. Discuss major changes with the team before making them.
- **Conflict Resolution:** Discuss different solutions, share research, and vote to make the final decision.

2. Meeting Schedule

- **Meetings**: Meet twice a week.
- **Agenda**: Prepare an agenda before each meeting.
- **Absences**: Inform the team in advance. Meetings may be recorded for absent members.
- **Sprints**: Plan the next sprint after the current one ends. Hold a retrospective meeting at the end of each sprint.

3. Teamwork & Responsibilities

- **Workload**: Divide tasks fairly and break large tasks into smaller parts.
- **Blockers**: Try to solve problems independently and share what you have tried before asking for help.
- **Accountability**: Update Jira regularly and link tasks to GitHub commits or documents.
- **Respect**: Communicate politely and support one another.

4. GitHub Workflow

- **Code Updates**: Inform the team on WhatsApp before or after pushing code.

- **Conflicts**: Discuss changes that affect other team members' code before resolving them.
- **Branches & Pull Requests**: Do not push directly to the main branch. Use feature branches and pull requests, with at least one team member reviewing and approving the changes.

Definition of Done

- User story meets acceptance criteria
- Code runs without known blocking errors
- Appropriate tests are completed and passing
- Peer review is completed before merge
- Database, API, and UI changes are integrated
- Documentation is updated where required
- Product Owner verifies the completed story
- Work is demonstrated during the sprint review
