

Project Description

AcadMate — AI-Powered Personalized Academic Advisement System

Project Name	AI-Powered Personalized Academic Advisement System
Team Project	AcadMate
Description	AcadMate is an AI-Powered Personalized Academic Advisement System that helps students and academic advisors monitor academic progress, identify students who may need support, explain the factors contributing to academic risk, and provide personalized recommendations.
Benefits & Outcomes	• Enables earlier, proactive identification of students who may need academic support • Delivers explainable, evidence-backed risk scores and personalized recommendations • Reduces advisor workload by prioritizing cases instead of manual review • Produces a working platform: risk-prediction model, dashboards, and recommendation engine • Improves student outcomes and retention through timely, targeted intervention
